

Electric high temp
hot air generator
HEATER

SUPER HEATER SH81

NPI

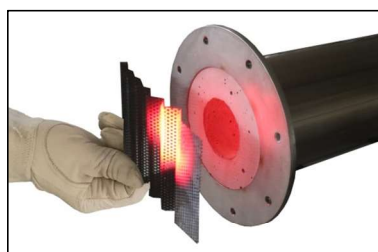

MAX1000℃

High temp hot air circulation

Standard product (Production delivery time: 40 days)

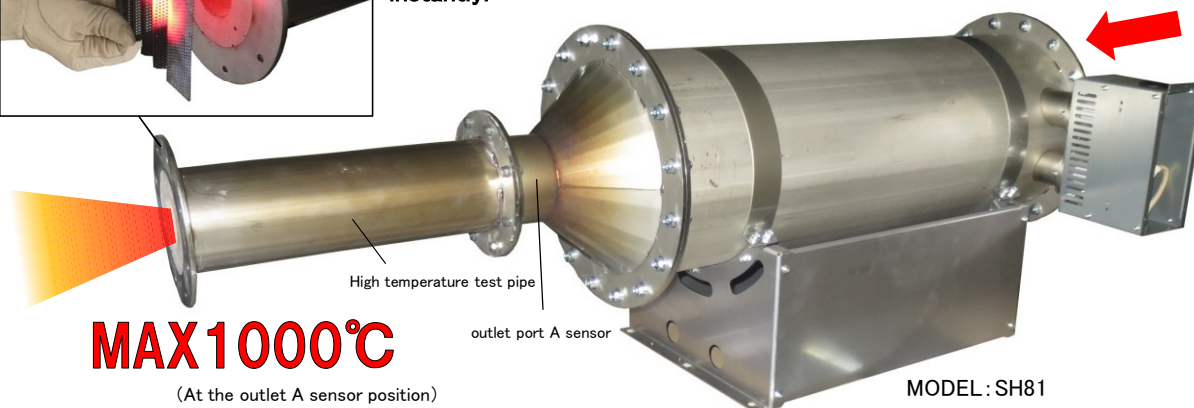

Power up by installing an additional heater

= Ideal Super Heater

High power that the SUS
plate can be heated
instantly!

- High temp hot air circulation is available
- Power up by installing an additional heater

MODEL : SH81

※The photo is a high temperature test
image of the product under development.

【Specification】 ◆If you are considering hot air, please feel free to contact us.

MODEL	SH81
POWER SUPPLY	単相200V 50/60Hz
HEATER VOL. (currency A at 200V)	10kW (50A)
Max hot air temp for continuous use	1000℃ (At the outlet A sensor position)
Outline	<ul style="list-style-type: none">• High temperature hot air circulation is available (energy saving)• Hot start is available (preheating operation)• Body allowable pressure 0.2MPa *• Equipped with A sensor for hot air temperature detection and overheat• Approx dimensions of the main body: φ300 x L1000 mm (excluding flange, terminal box, and mount)• Approx weight of the main body : 80kg• There is a dedicated temp controller unit that can control the temp perfectly (sold separately) (The temperature display of the dedicated temperature control unit controller is 999℃)• There is a large lineup of electric heaters that can be additionally installed for power up (sold separately).

※Some leaks, such as crab bubbles, may occur, but there is no problem with performance.
